

CLASSWORK-23.05.2025

Conversion Functions

Try It / Solve It

1. Convert January 3, 04, to the default date format 03-Jan-2004.
2. Convert today's date to a format such as: "Today is the 23 of May, Two Thousand Twenty-Five"
3. Create one query that will convert 25-Dec-2004 into each of the following (you will have to convert 25-Dec-2004 to a date and then to character data):
 - a) December 25th, 2004
 - b) DECEMBER 25TH, 2004
 - c) 25th december, 2004
4. Convert JUNE192004 to a date using the fx format model.
5. What is the distinction between implicit and explicit datatype conversion? Give an example of each.

For each of the following questions use table **EMPLOYEES**:

1. Ellen Abel is an employee who has received a \$2,000 raise. Display her first name and last name, her current salary, and her new salary. Display both salaries with a \$ and two decimal places. Label her new salary column AS New Salary.
2. List the first_name, the last_name and the hire_date of employees. Convert the hire_date to character data in the Month DD, YYYY format.
3. Display the first_name, the last_name, the department_id and the hire_date in the following format "21, September, 1989".
4. List the first_name, the last_name and salary for all employees. Display salary with a \$ sign and two decimal places.
5. Display the last_name and the hire_date in the format: "Steven was hired on 17, June , 1987".
6. Create a query that will display the salary in the format "\$24000.00".
7. Display the first_name, the last_name, the department_id and the hire_date in the following format "October, 1995".
8. Display the first_name, the last_name, the department_id and the hire_date in the following format " June 05, 1996" for employees having department_id=50 or 80.

9. Display the first_name, the last_name, the department_id and the hire_date in the following format " 17th of Jun, 1987" for employees having job_id= sa_rep or ad_vp.
10. Display the first_name, the last_name, the manager_id and the hire_date in the following format " June 05, 1996", and the salary in the following format "\$24000.00" for employees having manager_id=124 or 149.
11. Display the first_name, the last_name, the department_id and the hire_date in the following format " June 05, 1996" for employees hired after Matos.
12. Display the first_name, the last_name, the department_id and the hire_date in the following format " June 05, 1996" for employees who works in the same department as Rajs.
13. Display the first_name and the hire_date in the following format " MOURGOS was hired in November , 1999" for employees who works in the same department as Rajs.
14. Display the first_name, the last_name, the department_id and the salary in the following format " \$24000.00" for all the employees having the same job_id as Rajs.
15. Display the first_name, the last_name, the department_id and the hire_date in the following format "21, September, 1989" for all the employees hired in 1999.
16. Display the last name and the salary for all the employees in the following format "KING earns \$24000.00"
17. Display the first_name, the last_name, and the salary in the following format "\$24000.00" for employees who earns more than the average of the salary.
18. Display the last name and the salary in the following format "KING earns \$24000.00" for all the employees who earns more than the maximum salary for department_id=50.
19. Increase the salary for all employees having department_id=50 or 80 by 10% and display the last name and the salary in the following format "MOURGOS earns \$6380.00".
20. Display the first_name, the department_id and the hire_date in the following format " september, 1989" for all the employees having job_id=ad_vp or st_clerk.
