

EXDON 10.01.2025

1. Create the **EMPLNEW1** table with the following structure:

Column	Data Type
dept_id	NUMBER(4)
first_name	CHAR (40)
last_name	CHAR (40)
email	CHAR(40)
phone_number	NUMBER(15)
hire_date	DATE
job_id	CHAR(30)
salary	NUMBER(10,2)
bonus	NUMBER(6,2)

2. Insert rows into the table created based on the following table:

dept_id	first_name	last_name	email	phone_number	hire_date	job_id	salary	bonus
60	Sting	Karlos	sking	5151234567	17-Jun-2004	IT_PROG	24385.56	234.67
65	Nina	Kenny	nkochhar	5151234568	21-Sep-2003	AD_VP	17349.75	12.89
80	Philip	Zandir	pzaris	3546778921	15-Jan-2002	ADMIN	15674.38	11.35
60	Tom	Zlatan	tzlatan	4563667813	17-Sep-2002	IT_PROG	9874.75	24.67
80	Alain	Kahler	akhaler	7845632179	07-May-2003	ADMIN	9786.34	11.45
65	Leena	Thill	ldehaan	5151234569	13-Jan-2004	AD_VP	17373.15	0
60	Jennifer	Whalen	jwhalen	5151234444	17-Sep-2005	IT_PROG	4487.65	76.99
60	Shelley	Higgins	shiggins	5151238080	07-Jun-2004	IT_PROG	12113.40	0
60	Artur	Kim	akim	6538765320	23-Jun-2003	IT_PROG	1342.56	0
60	William	Mathieu	wgietz	5151238181	07-Jun-2002	IT_PROG	8300.52	15.00
70	Eleni	Thill	ezlotkey	1344429018	29-Jan-2005	SA_MAN	10567.20	26.00
80	Ellen	Thomas	eabel	1644429267	11-May-2004	ADMIN	11000.24	75.28
60	Alice	Zarea	azarea	3456272865	08-Feb-2007	IT_PROG	2013.78	0
70	Jonathon	Taylor	jtaylor	1644429265	24-Mar-2004	SA_MAN	8673.89	62.83

For all the following questions use **EMPLNEW1** table:

1. Display all the information about the employees.
2. Display the last_name and the first_name with uppercase letters in one column.
3. Display the sum of the salary for employees having job_id= IT_PROG or ADMIN.
4. Increase the salary of employees by 5% and display the last_name, the first_name the salary, and the new salary.
5. Increase the salary of employees by bonus and display all the information.

6. Decrease the salary of employees by 7% and display the last_name, the first_name the salary, and the new salary. Use an alias(NEW_SALARY) to display the new salary.
7. Display all the information about the employees having job_id "IT_PROG" and the salary<15000.
8. Display the average of the salary for employees having job_id= IT_PROG.
9. Display all the information for employees having job_id=IT_PROG and arrange in descending order according to salary.
- 10.Display the first_name and the last_name in uppercase in a new column „New“, and the dept_id for employees having dept_id=60 or 80(two methods).
- 11.Display the first_name, the last_name the salary and the dept_id for employees having dept_id >65.
- 12.Display the last names of all employees who have "o" or "a" in their last names.
- 13.Display all employees whose last names start with "K" or „Z“. Arrange in order according to salary.
- 14.Display all the information about the employees hired after 1st January 2004.
- 15.Display the maximum of the salary for employees having job_id=AD_VP or IT_PROG.
- 16.Display the average of the salary and round the result to 2 decimal places for employees having job_id=AD_VP or IT_PROG.
- 17.Display the first_name, the last_name, the dept_id and the salary for employees having bonus. Arrange in order according to salary.
- 18.Increase the salary of employees having job_id IT_PROG or AD_VP by 5% and display first_name, last_name, salary and the new salary using an alias.
- 19.Decrease the salary of employees by 5% and display first_name, last_name, salary and the new salary for employees having dept_id=70 or 80.
- 20.Display all the information about the employees having salary between 10000 and 15000.
- 21.Display the email in uppercase and the job_id with small letters in a new column „New“.
- 22.Arrange in order according to salary and display first_name, last_name, salary.
- 23.Display all the information about the employees having job_id=IT_PROG.
- 24.Display the last_name and the first_name in capital letters in a new column "Name" for employees having dept_id=80.
- 25.Write a query to return the first character of the first name concatenated to the last_name and the salary for employees.

26. Write a query to return the first character of the first name concatenated to the last_name, the salary, and the dept_id for employees having dept_id=60, 65 or 70 (two methods).
27. Increase the bonus for employees hired after 01.01.2005 by 10%, and display all the information.
28. Arrange in order according to salary and display first_name, last_name, salary.
29. Arranging in alphabetical order all the employees (use salary) and display all the informations for employees having dept_id= 60 or 65.
30. Arranging in descending order according to hire_date and display first_name, last_name, salary.
31. Decrease the bonus of employees having job_id= IT_PROG, by 3%. Display the first_name, the last_name, the salary, the job_id and the new salary.
32. Display all the information about the employees hired between January 1, 2004 and December 31, 2005.
33. Display the maximum of bonus for all the employees.
34. Display the minimum of bonus for employees having dept_id=80.
35. Using a substitution variable, display the first_name, the last_name, the dept_id, and the salary for employees having dept_id=70 or 60.
36. Using a substitution variable for job_id, display the first_name, the last_name, the dept_id, and the job_id for employees having job_id=IT_PROG or ADMIN.
37. Using a substitution variable for dept_id, display the first_name, the last_name, the dept_id, the hire_date and the salary for employees having department_id=80 or 50 and hired after 01.05.1998.
38. Using a substitution variable for job_id, display the last_name, the dept_id, and the job_id for employees having job_id=IT_PROG or ADMIN.
39. Display the average of the salary and round the result to 2 decimal places for employees having job_id= IT_PROG or ADMIN.
40. Using a group function, display the last name in alphabetical order.
