

EXDON 24.01.2025

Exercise A: Insert new rows into the table **EMPLNEW1** you already created:

dept_id	first_name	last_name	email	phone_number	hire_date	job_id	salary	bonus
60	Patricia	Mathieu	pmathieu	5151234569	18-Jun-2004	IT_PROG	24385.56	234.67
65	Priscilla	Talbot	ptalbot	5151234554	28-Sep-2003	AD_VP	17349.75	12.89
80	Jean	McDonald	jmcdonald	3546778972	13-Jan-2002	ADMIN	15674.38	11.35
60	Laure	Maillard	lmaillard	4563667866	15-Sep-2002	IT_PROG	9874.75	24.67
80	Alain	Calteux	acalteux	7845632175	09-May-2003	ADMIN	9786.34	11.45
65	Gabriela	Guerrero	gguerrero	5151234582	12-Jan-2004	AD_VP	17373.15	45.78
60	Fabio	Ciucci	fciucci	5151234455	21-Sep-2005	IT_PROG	4487.65	76.99
60	Christian	Heilmann	cheilmann	5151238084	25-Jun-2004	IT_PROG	12113.40	35.29

Use EMPLNEW1 table for the following:

Exercise B: Check if the following commands have errors or not. Justify the answer:

1. select * for EMPLNEW1
2. select sum(salary), max(salary) from EMPLNEW1
3. select * EMPLNEW1 where job_id=st_clerk
4. select first name, last name, salary from EMPLNEW1
5. select first_name, last_name from EMPLNEW1 where salary<7500
6. select salary where department_id=80 from EMPLNEW1
7. select first_name, last_name, salary order by salary from EMPLNEW1
8. select first_name, last_name from EMPLNEW1 where salary>7000
9. select *, first_name, last_name from EMPLNEW1
10. select first_name, last_name, salary order by salary from EMPLNEW1
11. select first_name, last_name where salary>7000 from EMPLNEW1
12. select avg(salary) from EMPLNEW1
13. select last_name, avg(salary) from EMPLNEW1
14. select first_name, last_name from EMPLNEW1 where hire_date>(select hire_date from EMPLNEW1 where last_name='Kim')
15. select first_name, last_name from EMPLNEW1 where hire_date>(select hire_date from EMPLNEW1 where last_name='Thill')
16. select first_name, last_name from EMPLNEW1 where salary>(select salary from EMPLNEW1 where last_name=' Mathieu ')

17. select first_name, last_name from EMPLNEW1 where hire_date > (select salary from EMPLNEW1 where last_name = 'Thill')
18. select first_name, last_name from EMPLNEW1 where salary > (select avg(salary) from EMPLNEW1 where last_name = 'Thill')
19. select first_name, last_name from EMPLNEW1 where hire_date > (select hire_date from EMPLNEW1 where last_name = 'Thill')
20. select first_name, last_name from EMPLNEW1 where dept_id > (select dept_id from EMPLNEW1 where last_name = 'Taylor')

Exercise C:

21. Display all the information about the employees.
22. Display the last_name and the first_name with uppercase letters in one column.
23. Display the sum of the salary for employees having job_id = IT_PROG or ADMIN.
24. Increase the salary of employees by 5% and display the last_name, the first_name, the old salary, and the new salary.
